

Springwood's Covid-19 booster clinics are scheduled for May 25, 2022. Due to the increased vulnerability of our memory care and assisted living residents, these folks will receive vaccinations 9 am to 1 pm in Nightingale Lane and 2 pm to 5 pm in Nightingale Suites.

Springwood was offered limited availability for our independent living residents, and those appointments have already been committed. If you have not been contacted, please reach out to your medical provider for other booster appointment options.
